

A special meeting was called to order by Chairman Howard Fry at the Cogan House Township Building at 9:00 AM on June 11, 2019, Supervisor Roupp & Supervisor Emery attended also. This meeting was called to get more information about the septic system that Jaron and Amanda Youmans were required to put in to replace the current system. Bob Bertin and Mike Maneval attended at the request of the supervisors to explain the system. At the time he advised that it would be a sand mound or what is called an Eljin System that requires multiple tanks. All the supervisors were concerned at the slope of the hill and how it would affect the other property owner below them. It was brought to their attention that the property owners below them have an issue with water in the basement from underground and was concerned that it may be contaminated by the water in the system. Mr. Bertin advised it is over the required distance required by DEP and would not affect the property owners. Mr. Bertin called DEP during the meeting and they advised it was a safe system and the required distance was okay. The system will be inspected on a regular basis at certain intervals etc.

Chairman Fry made a motion to accept the Resolution Plan Revision for the new land development for Jaron & Amanda Youman for the Component 2 System and Supervisor Emery seconded and voted with a 3 – 0 vote.

Meeting was adjourned at 11:00 AM

Secretary
